EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patricia Verlangieri on 6/13/2005.

The application has been amended as follows:

In the Abstract:

Line 1 of the abstract should be changed by replacing the word "comprising" with the word "including".

Line 7 of the abstract should be changed to remove the paragraph separator. The first and second paragraphs should be combined into one single paragraph.

Line 11 of the abstract, the words "Figure 1" should be removed.

In the Claims:

Claim 5 line 1, the word "et" is replaced by the word "and".

Claim 6 line 1, the word "et" is replaced by the word "and".

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of a plasma display panel including a green phosphor blend which includes at least 80% by weight of a first phosphor of a first aluminate and a second phosphor of a second aluminate where the first phosphor is doped with manganese but not terbium and the second phosphor is doped with cerium and terbium but not manganese. The prior art of reference discloses the use of aluminates, for instance a cerium terbium doped aluminate, for use as a green phosphor in a plasma display panel, but does not indicate the use of two aluminates mixed together for use as a green phosphor blend in the device. Further, though phosphors of both the first type and second type above are known, the prior art of record does not demonstrate the use of phosphors meeting both types together in a plasma display panel or indicate and reasonable motivation for combining the two types of phosphors.

Regarding claims 2-6, claims 2-6 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2879

Yokosawa et al. (US 2002/0041145 A1) discloses the use of terbium and cerium doped aluminates in a plasma display panel.
